

Legal Aid Lawyers in Chilliwack

Legal Aid Lawyers in Chilliwack - The developing world of energy and energy markets is the specialty of our company's energy law firm. There are numerous new opportunities and challenges. Our company has a team of legal professionals with the knowledge and experience to assist clients in taking advantage of this new world. Our energy law group provides a comprehensive array of legal services to worldwide and national energy clients. We serve everyone from start-up companies to major corporations. Whether your company provides solar energy technology or more conventional forms of energy generation, both have complex transactional needs. We provide realistic and sound representation and suggestion drawing on a depth of knowledge of the legal, economic, and political issues involved in energy matters.

1. We help with new developments connected to renewable/alternative energy technologies (e.g., wind, fuel cells, solar, biomass, geothermal, hydropower and biofuels). In the case of the solar energy industry, we act for developers, manufacturers, and users in preparation of land and roof release, tax matters, development agreements, regulatory and legislative problems, commercial arrangements and financing agreements with investors with investors along with legislative and regulatory problems;
2. We are involved in energy efficiency demand management and cogeneration projects in institutional, commercial, and industrial contexts, consisting of financing, engineering, and construction matters;
3. We offer advice to private and public entities in respect of new statutory requirements to complete energy plans, and their land use plan integration;
4. We assist to negotiate and structure joint venture arrangements for energy projects, and can assist in project financing, transfer and licensing arrangements, and acquisition;
5. Within the early stages of commercialization and financing of clean technologies, we can provide many services to assist;
6. With new environmental and energy law requirements including carbon management and disclosure, we can help with compliance and approvals;
7. We assist to create, protect and commercialize intellectual property rights;
8. We could help in venture capital opportunities, private equity, initial public offering opportunities;
9. We represent clients at hearings before regulatory commissions and agencies regarding matters like "leave to construct" applications for both gas and electricity infrastructure, setting of rates, creation of independent transmission businesses, licensing, approvals, compliance issues and permitting
10. We could help the boards of directors and other senior management on certain issues comprising corporate governance and disclosure, environmental stewardship and liability issues, climate change, changing regulatory concerns, and, where appropriate, assisting in representations to governments.
