

Chilliwack Patent Lawyers

Chilliwack Patent Lawyers - Our company leads the way in intellectual property law. We have an Intellectual Property (IP) Group with a wide range of technological knowledge specializing in the protection, use, exploitation and development of information technology and intellectual property.

Our professionals are experienced at patent applications and trade-mark applications and registrations. Our members have assisted with many industrial design registrations and applications.

To be able to offer useful legal recommendation concerning various difficult IT issues, a wide range of scientific expertise and a legal background is needed. Our experts have made the deepest research in these sciences. Some have engineering degrees while others have graduate degrees in the areas of physics, biotechnology, chemistry, electrical engineering, electronics and engineering physics. Among our group are members with doctoral degrees in applied chemistry, analytical chemistry, nutrition & metabolism, genetics, plant biogenetics, telecommunications, and oncology. Advanced scientific backgrounds combined with considerable skill at the bench equip our scientific experts with extraordinary expertise and skills.

The Industry

Intangible property can be the most valuable property in a lot of businesses and research organizations. The control of this crucial intellectual property needs the obtaining of effective and cost-efficient protection. Telecommunications, cultural industries and technology are essential to the country's economic growth and health. In order to ensure continued economic success, companies should have a well-developed intellectual property strategy.

Gaining access to the rights of others through licensing-in or cross-licensing as their is a trend to protect the results of research before public dissemination grows. Flexibility is therefore in a position in intellectual property rights to serve the dual purpose of providing an asset used to add revenues through licensing and to secure a niche market. A research-oriented or start-up organization can achieve substantial advantages by combining intellectual property assets through cross-licensing with those of a big multinational corporation.

Protecting Intangible Assets

For lots of companies in today's competitive conditions, intangible assets like for instance brands, trade secrets, and goodwill are normally at the heart of commercial success. Therefore, protecting intangible assets, that may comprise a significant part of their value, is an essential approach to business.

Inter-disciplinary Approach

We can offer a full range of services thanks to our inter-disciplinary approach. We are well positioned to offer up-to-date and knowledgeable suggestion both to companies in the area of technology and to those affected only incidentally by new technological developments.
