

Patent Lawyer Chilliwack

Patent Lawyer Chilliwack - Our Intellectual Property lawyers understand that for lots of companies their intellectual property is a real important asset. Intellectual property is an important component in attracting and retaining market share. It defines your company in the market place, whether by means of patents that exclude competitors, trademarks which identify your products, or copyright which prevents illegal copying of your intellectual assets.

We have years of knowledge in the effective resolution and practical management of intellectual property disputes at all levels of the courts. Our clients come from a wide range of industries, from start-ups to global companies.

The primary factors which our companies believe should be the client's goals and what makes sense to them from a business standpoint. Every infringement on intellectual property rights will not in all instances warrant a court action. Intellectual property litigation is expensive because of the complexity of thorough analysis of rights and using appropriate professionals. Where infringement disputes are simple and straight-forward, disputes often can be solved through negotiated arrangements with built in deterrence terms. In circumstances where court action is needed, we pursue strategies that are compatible with a business-oriented approach.

Our company and its lawyers are really experienced and skilled in representing our clients in claims of intellectual property infringement. Our well-known litigators have the knowledge to communicate to the courts the technical issues involved, whether you need defending against allegations of intellectual property infringement, or you are an owner of intellectual property pursuing infringers. We provide legal suggestion and representation in disputes related to patents, trademarks, copyright, industrial design, trade secrets, domain names, interlocutory injunctions ("emergency" relief from infringement until trial) and Anton Pillar Orders (civil search and seizure orders).
